PROJECT DOCUMENTATION

Employee Wellness Management System

Built with Power Apps, Dataverse and Power Automate

WellNest app | October 2026

Use Case

Why the company needs this app:

- Employee wellness details were kept in different places (sheets, mails), so there was no single list of who is enrolled in the wellness programme.
- The wellness team had no easy way to see which activities are pending, ongoing, finished or cancelled.
- Finding one activity or one employee record took too long without search and filters.
- When a new activity was added, someone had to inform the team manually. The app now sends the mail on its own.
- Administrators needed to update activities from their phone, so a mobile canvas app was built.
- Employee data should be safe from accidental changes, so employee records are shown in a read-only screen.
- Management needs simple reports, such as employees with high or low activity and active or inactive employees. Dataverse views give this.

Who uses it

The wellness administrator uses the canvas app and the model-driven app to enrol employees, add and edit activities, and check status.

Project summary

Item	Count	Details
Dataverse tables	2	Employee Wellness Profile, Wellness Activity
Power Automate flow	1	Email when a new activity is added
Business rules	3	Score, enrollment date and range checks
Forms	1	Employee Wellness Profile form with 2 tabs
Views	9	5 for activities, 4 for employees
Model-driven app pages	2	Activities and Employee Wellness Profiles
Canvas app screens	7	Splash, Home, Activities, Edit Record, Confirmation, Employee Profiles, Employee Details

Dataverse Tables

Two tables store all the data. The first one holds the employee profiles.

Employee Wellness Profile

Each row is one employee in the wellness programme. The primary column is Employee Name.

Column	Data type	Required
Employee Name	Text	Yes
Employee ID	Whole Number	Yes
Email	Email	Yes
Department	Choice	Yes
Designation	Text	Yes
Wellness Goal	Choice	Yes
Activity Level	Choice	Yes
Wellness Score	Decimal Number (0 to 100, 2 decimals)	No
Enrollment Date	Date Only	Yes
Wellness Status	Choice	Yes
Inactivation Reason	Multiple Lines of Text	No
Notes	Multiple Lines of Text	No

Choice values

Column	Values
Department	IT, HR, Finance, Sales, Marketing, Operations
Wellness Goal	General Wellness, Fitness, Stress Management, Weight Management, Mindfulness, Nutrition
Activity Level	Low, Moderate, High
Wellness Status	Pending, Ongoing, Finished, Cancelled
Employee Status (app and form)	Active, Inactive

Wellness Activity Table

Each row is one wellness activity done by an employee. The primary column is Activity Name. The Activity ID is generated automatically (autonumber), so nobody types it.

Column	Data type	Required
Activity Name	Text	Yes
Activity ID	Autonumber	Yes
Employee	Lookup (Employee Wellness Profile)	Yes
Activity Type	Choice	Yes
Activity Date	Date Only	Yes
Duration (Minutes)	Whole Number	Yes
Calories Burned	Whole Number	No
Activity Status	Choice	Yes
Completion Date	Date Only	No
Wellness Points	Whole Number	No
Remarks	Multiple Lines of Text	No

Choice values

Column	Values
Activity Type	Meditation, Mindfulness Break, Breathing Exercise, Health Check, Nutrition Workshop, Wellness Webinar, Physical Exercise, Other
Activity Status	Pending (planned, not started), Ongoing (in progress), Finished (completed), Cancelled

Relationship

Many activities can belong to one employee. The link is the Employee lookup column in the Wellness Activity table.

Business Rules

No.	Rule	What the user sees
1	Wellness Score must be greater than zero when a score is entered	Error message for zero or negative score
2	Enrollment Date must be greater than or equal to the record Created On date	Validation message if the date is not allowed
3	Value must be between 0 and 100	Range validation message

Power Automate Flow

One flow is used. It sends an email whenever a new wellness activity is recorded, so the team does not have to be told manually.

Step	What happens
1	A new row is created in the Wellness Activities table
2	The flow starts automatically
3	Activity and employee details are collected
4	An email notification is sent

Forms

The Employee Wellness Profile form has two tabs. Required fields are marked with a red star.

Tab	Section	Fields
Employee Information	Main	Owner, Email, Employee Name, Department, Designation, Employee Status
Wellness Details	Wellness	Wellness Goal, Activity Level, Wellness Score, Enrollment Date
Wellness Details	Status and Notes	Notes, Status

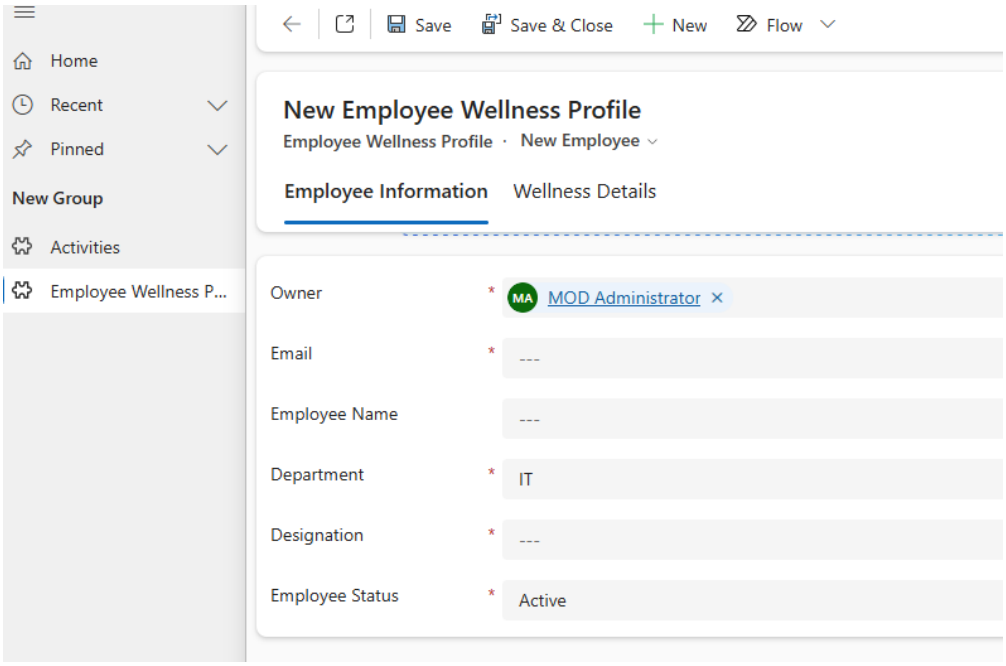

Figure 1: Employee Information tab

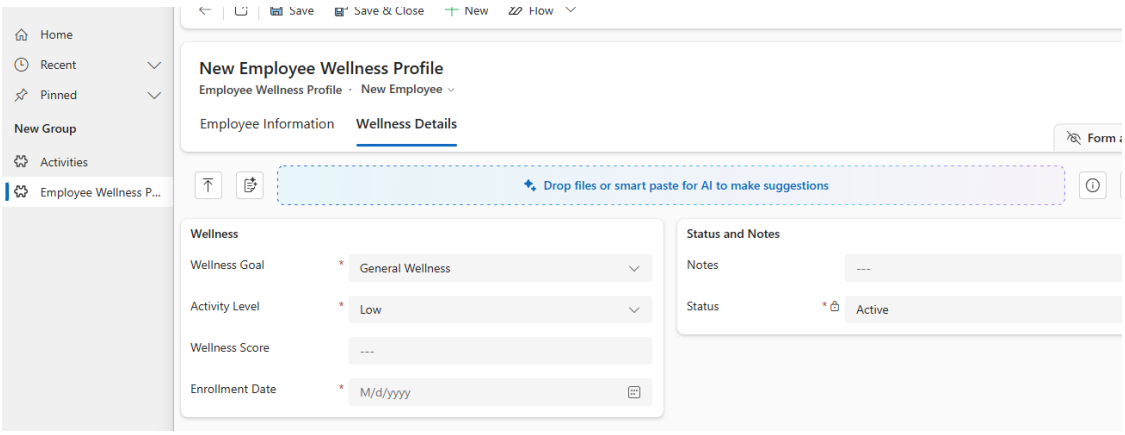

Figure 2: Wellness Details tab

Views

Nine views were created so records can be opened by category.

Table	View	Shows
Wellness Activity	Physical Exercise	Activity Type is Physical Exercise
Wellness Activity	Pending Activities	Status is Pending
Wellness Activity	Ongoing Activities	Status is Ongoing
Wellness Activity	Finished Activities	Status is Finished
Wellness Activity	Cancelled Activities	Status is Cancelled
Employee Wellness Profile	High Activity	Activity Level is High
Employee Wellness Profile	Low Activity	Activity Level is Low
Employee Wellness Profile	Active Employees in Wellness	Active employees
Employee Wellness Profile	Inactive Employees in Wellness	Inactive employees

Model-Driven App

The model-driven app has two pages under one menu group.

Page	Role
Activities	Open, create and edit wellness activity records
Employee Wellness Profiles	Open, create and edit employee profile records

Canvas App

WellNest is the mobile app for administrators. It has seven screens.

No.	Screen	Use
1	Splash	Start screen with the WellNest logo
2	Home	Welcome message and three buttons: View Activities, Add Activity, View Employee
3	Wellness Activities	Activity gallery with search, filter and a plus button to add
4	Edit Record	Popup to add or edit an activity
5	Confirmation	Message after saving: Activity was successfully Edited
6	Employee Profiles	Read-only list of employees with status and score
7	Employee Details	Read-only details of the selected employee

Conclusion

The Employee Wellness Management System keeps employee profiles and wellness activities in one place. Administrators can add and edit activities from the canvas app, search and filter them, view employees in read-only mode, and the team gets an email when a new activity is added.
